

## **LETTER OF RECOMMENDATION**

Date: 26<sup>th</sup> November 2016

To whom it may concern

I am Professor G.J. Sahani from the Department of Computer Engineering – Sardar Vallabhbhai Patel Institute of Technology - Vasad. I would like to use this letter to recommend one of my student Mr. **Rushabh Shah** for a place on the MS in Computer Science programme in your reputed university.

Rushabh Shah is in the final year of his BE Computer Engineering course. He is very talented and inquisitive type of student. I was his tutor in “**Analysis and Design of Algorithm**” in 3<sup>th</sup> sem and “**Information and Network Security**” in the present semester. Academically, I would rate Rushabh among the **top 10%** in the class of 160, although, his programming skill is what makes him stand out in the crowd. He has shown keen interest in the in the practical approach of the subject. He has participated in many workshops and many college activities. In his final year project, he has selected the topic of AI, AI based Smart Examination System, which is not introduced to them in the academics which shows he is comfortable stepping out of his comfort zone. I being his project guide can assure that he is a hardworking individual.

Rushabh is soft-spoken, well-mannered and ambition student. He is highly attentive and a regular student, and well-disciplined student. He will not let go of things he doesn't understand or the things which are unclear at that moment. He will reach out and clear it up. Knowing him for almost three years I can say he is well focused and attentive student will be great academic subject for your institution.

I wish Rushabh all the very best in his academic pursuit and hope that he will get a chance to study the MS in Computer Science programme in your reputed university.

Mr. G .J. Sahani  
Asst. Professor, SVIT-Vasad
